IMPORTANT NOTICE TO DISTRIBUTORS & VARs

Download of all software components from Aladdin's Licensing Center requires a valid "Product Download License" to be issued to the customer. Licenses can be allocated and issued to a customer online at <http://www.aladdin.com/lc/>. Please be sure to properly allocate a license to a customer immediately upon shipment. If you are not familiar with using the Licensing Center, please contact your Aladdin Account Manager for assistance.

AUTHENTICATION PRICE LIST US Dollars

Authenticators - Hardware and Card Authenticators

Important Note on eToken Hardware Pricing:
Software is priced separately.

When purchased with software in the same order, eToken Category B authenticators receive a Category A discount, and Category C authenticators (excluding cards and readers) receive a **Category B discount**.

As a general guideline, all eToken authenticator and smartcard orders should now be fulfilled with the 72K (Java card based) model. These authenticators **require eToken PKI Client 4.55 and up**. In situations where operation with solution partner applications (e.g. pre-boot authentication), support for eToken PKI Client versions older than 4.55, or existing FIPS 140-2 certification are needed, eToken 32K / 64K models may be ordered as appropriate. Please view the **Customization, Add-ons, and Additional Products addendum** for further details.

If FIPS 140-2 certified authenticators are needed, please inquire about appropriate models. Note that to comply with FIPS 140-2, authenticators need to be initialized accordingly; Aladdin handles this free of charge. Please specify when ordering if FIPS initialized authenticators are required.

Getting started with SafeWord 2008

There are 3 simple ways to start using SafeWord 2008:

- 1) Through the purchase of a SafeWord 2008 Starter Pack
- 2) By ordering an evaluation and then purchasing the eval conversion/activation for the SafeWord 2008 Starter Pack
- 3) Current customers can use existing authenticators with SafeWord 2008.

All customers are required to purchase at least one SafeWord 2008 Starter Pack. SafeWord 2008 Starter Packs come with everything needed to get started; hardware authenticators, software and first year of support and authenticator warranty. It also includes a 30-day evaluation of Enterprise Solution Pack and 5 sample SafeWord MobilePass Software Authenticators. Customers can purchase additional authenticators in packs or in specific quantities to add additional users to their Starter Pack. Aladdin recommends that customers evaluate and purchase the Enterprise Solution Pack (ESP). A 30-day evaluation of ESP is included with each SafeWord 2008 Starter Pack and Evaluation. In addition to the SafeWord 2008 Starter Packs with Alpine and eToken PASS authenticators, we also offer branded SafeWord 2008 Starter Packs for Citrix, Cisco, Check Point and Nortel.

Note: A 30-day evaluation of SafeWord 2008's Enterprise Solution Pack is included with every SafeWord 2008 Starter Pack as well as SafeWord 2008 Evaluation copies. This is the primary method for evaluating Enterprise Solution Pack and its features. The SafeWord 2008, ESP Eval Pack SKU listed above is only for customers and prospects who want to evaluate the Enterprise Solution Pack after the 30 day period has expired.

AUTHENTICATION PRICE LIST US Dollars

Authentication Care

General Terms

1. Support is on a per customer basis and packages cannot be combined. Partial customer care coverage is not available. Fees will always include all purchased solutions and not part of them. The software care cover period will commence on Software License execution date, or as soon as previous software care cover period ends.
2. Fees are calculated on an annual basis and are billed at the beginning of the customer care cover period. Fees will be automatically billed every year with respect to previously purchased products as well as all new products purchased by the customer up to that point.
3. Customer may reject renewal or terminate coverage at any time by providing written notice. The proportional balance will be reconciled. Software care coverage may be reinstated subject to payment of the then current Reinstatement Fees.

eToken Customer Care

eToken Software Care is available to customers for 1, 2, or 3 year periods. Each new software purchase includes Software Care. Customers may also choose to renew their Care coverage for previously purchased software (subject to payment of applicable fees).

Software Care provides customers with two services during the coverage period: software upgrades and technical support. Customers receive free software upgrades for all covered licensed software. Technical support is available under the terms set forth in Aladdin's eToken SLA.

Distributors and resellers are responsible for first and second line customer support respectively. eToken distributors or resellers that require technical assistance may obtain 3rd level support from the Authentication Technical Support Center which also handles 1st and 2nd level support, for direct eToken customers in the US and Canada only. Annual support contracts from Aladdin are available to the channel. For further information, please see the eToken SLA as annexed to the agreement between Distributor/Reseller and Aladdin.

eToken Software Update Mechanism

Continued download access for latest software upgrades and bug fixes will be available from the Aladdin License Center web site. Users will be issued access credentials via email.

eToken Manufacturing Warranty (included in basic product price)

The basic eToken warranty consists of a 12-month limited warranty for hardware failures and a 12-month bug fix program for the licensed software components purchased. Aladdin assumes no responsibility for maintenance or support as stipulated in our End User License Agreement (EULA).

SafeWord Customer Care

For SafeWord 2008 customers

For customers who purchase maintenance services with 24x7 customer service, we provide comprehensive support including lifetime warranty for authenticators under maintenance. Lifetime warranty means that the customers may request repair or replace any time provided that they are under contract for maintenance services.

Support renewals are for all authenticators purchased to that date, including authenticators purchased after the initial Starter Pack. For example, if a customer purchases 1000 authenticators on January 1, 2009, then purchases 300 additional authenticators on March 1, customer must renew 1,300 authenticators on January 1, 2010.

AUTHENTICATION PRICE LIST US Dollars

Authentication General Terms & Conditions

General

Prices listed in the price list are valid until notification. Periodic updates will be issued and will be effective within 30 days of notification. Price list is subject to change with 30 days notice.

Product Categories

Product Category	Product
M	SafeWord 2008 Software
K	SafeWord Authenticators
L	SafeWord 2008 Authenticator Programming
S	SafeWord 2008 Software Care
A	eToken Software eToken Starter Packages
B	Hardware Authenticators (eToken PRO, eToken PRO Anywhere, eToken NG-OTP, eToken PASS, Alpine, Gold) eToken Software Care Peripherals: Shells, cables & add-ons SafeWord Authenticator Accessories and Services

The categories represent an agreed discount level for the mentioned products. Please refer to your distribution agreement for details. Please contact your Aladdin account manager for discounts on quantities larger than those covered in the Price List.

Software License & Download

Download of all software components from Aladdin's Licensing Center requires a valid "Product Download License" to be issued to the customer. Licenses can be allocated and issued to a customer online. <http://www.aladdin.com/lc/>. Please be sure to properly allocate a license to a customer immediately upon shipment. If you are not familiar with using the Licensing Center, please contact your Aladdin Account Manager for assistance.

Price List Terms

Prices are quoted in the specific currency listed on the price list.

Prices are FOB Aladdin Knowledge subsidiary, unless otherwise stated.

eToken prices include a 12-month manufacturing warranty on hardware and a 12-month warranty on software.

Prices exclude local taxes, VAT, shipment or installation charges.

For pricing on larger than listed quantities, please contact your local sales representative.

Delivery time may vary.

Note: Information on ordering eToken PRO authenticators:

As a general guideline, the default for all eToken Smartcard based orders is the 72K (Java card based) model. In specific situations, as listed below, the older eToken PRO 32K and 64K models (based on Siemens CardOS) are still available:

- a) If the eToken solution is being used with a partner's application, e.g. pre-boot authentication - *please check with your Aladdin representative if the 72K authenticator model is compatible*
- b) If the customer is an existing customer using an eToken PKI Client (previously called RTE) version older than 4.55, and an upgrade of the PKI Client (recommended) is not accepted by the customer
- c) If existing FIPS 140-2 device certification is required by the customer
(Note: eToken 72K Java based authenticators are in process for FIPS 140-2 Level 2 and 3 certification)

(*) If FIPS 140-2 L2 certified authenticators are needed, please inquire about appropriate models. Note that to comply with FIPS 140-2, authenticators need to be initialized accordingly; Aladdin handles this free of charge. Please specify when ordering if FIPS initialized authenticators are required.
(**) FIPS 140-2 L3 Includes special filling for increased physical security.

Note: Software is priced separately.

(*) Software (e.g. eToken PKI Client) is required when supplying smartcard authenticators to end customers. **Software is priced separately.**

IMPORTANT NOTE ON HARDWARE PRICING:

The above authenticator prices do not include software. Software is required for device usage. When purchased together with software in the same order, Category B authenticators (eToken PRO and eToken NG-OTP) will receive a Category A discount level, and category C authenticators (eToken NG-FLASH) will receive a Category B discount level.
